

DATA SHEET

COOL TITE

COMPOSITION

Water • Kaolin • *Aloe glycolic extract* • *Olea europaea* leaf extract • *Melaleuca alternifolia* leaf oil • *Gaultheria procumbens* leaf oil • *Mentha arvensis* herb oil • Chlorophyll

DOSAGE AND METHOD OF USE

- Clean the part to be treated completely and leave the hair moist
- Apply Cool Tite to affected parts without bandage (like a cretate) or with bandage (plastic film, cotton and bandage)
- leave for at least 24 hours
- remove with water and repeat if necessary

Cool Tite can also be used under the sole of the foot: thanks to its distinct cooling action, it is also effective when applied on the sole (sobbing or heat) or on the hoo wall and coronary horn:

- Clean the affected area, apply a layer, cover with paper and bandage

PACKAGING

5 kg bucket

DESCRIPTION

Clay-based formulation enriched with essential oils with cooling and relieving action for application to joints and tendons after work when affected by heat and swelling.
