DATA SHEET

AMINOPLUS

COMPOSITION

Yeast hydrolyzed • fermented soya flour (FermSoy) • glycerine • glucose syrup • whey powder • powder cellulose • sucrose

ADDITIVES/KG

Aminoacids: L-isoleucine (3c381) 77g, L-leucine (3c382) 85 g, L-hystidine monohydrochloride (3c352) 76 g;

Flavourings: L-valine (2b17028) 72 g;

Vitamins: L-carnitine L- tartrate (3a911) 5 g

DOSAGE AND METHOD OF USE

Horse (500 kg): 1 syringe per day (50 g)

PACKAGING

50 g oral paste syringe

DESCRIPTION

A complementary feed in a **50 g single-dose syringe**, formulated to provide the horse with a concentrated supply of selected amino acids, including **branched-chain amino acids (BCAAs)**.

Its formulation contains **L-leucine, L-isoleucine, L-valine and L-histidine**, combined with **L-carnitine L-tartrate**. The presence of hydrolysed yeast and fermented soybean flour completes a formula designed to support the horse's nutritional needs. These two ingredients help maintain optimal intestinal conditions for better amino acid absorption.

The practical **single-dose oral syringe** allows for simple, quick and precise administration, making Aminoplus particularly convenient to use **before a race or competition**.
