DATA SHEET

ANIMALINTEX
DOSAGE AND METHOD OF USE

• Thoroughly clean the area to be treated
• place the Animalintex flap in a shallow bowl, with the plasticised surface facing outwards
• Pour water into the container around the edges of Animalintex
• After it has soaked in water, remove the pack from the basin and remove the excess water with gentle pressure
• Apply the pack to the affected area with the plasticised surface outwards (not in contact with the skin), shaping it around the edges of the application area
• Apply an external restraining bandage, ensuring that the wrap is completely covered
