DOSAGE AND METHOD OF USE

Horse (500 kg): 1 syringe 4/5 hours before competitions or stressful situations

PACKAGING

50 g oral paste syringe

DESCRIPTION

An oral paste product suitable for horses that exhibit, by their nature, excitatory states or states of impatience that occur in particular stressful situations.

THE PRODUCT CONTAINS

In addition to the traditional ingredients found in other similar products (**tryptophan**, **magnesium** and **B vitamins**), Be Kalm contains:

• **Fermented plant extracts:** the purpose of the fermentation process is to remove most of the toxic or anti-nutritional substances present in the flours and to make the active core of the various substances available

• ***Aspergillus oryzae* extract**

• ***Ulmus rubra* bark:** lubricating action on the gastric mucosa

• **Fermented soya flour:** fermentation allows the release of peptides that act at gastrointestinal level

• **Fermented liquorice and olive extracts:** antioxidant properties
