DATA SHEET

ELECTROLYTE C

COMPOSITION

Maltodextrin (24%) • potassium chloride • sodium chloride • monosodium phosphate • potassium citrate • disodium phosphate • calcium carbonate • magnesium sulphate heptahydrate • sucrose

ADDITIVES/KG

Antioxidants: calcium ascorbate (1b302) 12 g;
Flavourings: glycine (2b17034) 49 g.

DOSAGE AND METHOD OF USE

The mode of use must be adapted to the duration and intensity of the exercise performed by the horse (500kg):
• *Light work:* 30 g per day (1 scoop)
• *Intensive work:* 60 g per day (2 scoops)
To be mixed into the ration or dissolved in water.

SPECIAL WARNINGS

Leave water available in the time following the administration of the product

ANALYTICAL CONSTITUENTS

Sodium	10.0%
Calcium	1.0%
Phosphorus	4.0%
Chloride	21.0%
Potassium	13.0%
Magnesium	0.2%

PACKAGING

3 kg bucket

DESCRIPTION

Electrolyte mixture, containing **vitamin C** (calcium ascorbate, non-gastroless), **amino acids** and **maltodextrin**. This product is indicated for compensating electrolyte losses in the case of heavy sweating.
