

DATA SHEET

RESPADRIL AEROSOL

COMPOSITION

(per 10ml vial)

Etyldigglycol, Essential oils 0.8 g (*Eucalyptus globulus*, clove),
Monopropyleneglycol, Water

DOSAGE AND METHOD OF USE

Liquid for use in conjunction with a nebuliser.

- Alone: decongesting and disinfecting the airways
- In combination with other molecules during the same session:
favouring the diffusion of the associated active ingredients

PACKAGING

5 vials of 10 ml

DESCRIPTION

For your horse's respiratory comfort

The essential oils contained in Respadril have antiseptic and ammonia capturing properties, a factor that damages the horse's respiratory system.

THE PRODUCT CONTAINS

Essential clove oil (*Eugenia caryophyllata*):

- anti-microbial properties: antiviral and bacterial properties
- anti-inflammatory properties: via inflammatory cascade inhibition (COX-2)
- local anaesthetic effects

Essential eucalyptus oil (*Eucalyptus globulus*):

- anti-microbial properties: antiviral and bacterial properties
- demonstrated anti-inflammatory properties
- expectorant properties
