DOSAGE AND METHOD OF USE

- **Horse (500 kg):** 100 g (1 scoop) per day
 - **Foal/pony:** 50 g (half a scoop) per day
- To be mixed into the feed ration

PACKAGING

3 kg bucket

DESCRIPTION

Blend of specific ingredients that help maintain **gastric function** in horses of all types and ages. As is long recognised, there are risk factors (stressors) in any horse's life that can act negatively and compromise the horse's wellbeing, also involving the anatomical and functional integrity of the horse's gastric structure.

Savegard is recommended in situations that represent potential gastric problems, usually preceded or accompanied by more or less obvious signs (poor appetite, weight loss, decline in athletic performance, dull coat), such as:

- periods of intense training and exercise
- competition periods
- horses that are transported
- changes of diet
- pregnancy

THE PRODUCT CONTAINS

- **Rice middlings:** maintaining the integrity of the gastrointestinal tract
- **FermSoy:** for the integrity of the digestive tract
- **Calcium carbonate:** buffering effect on the gastric mucosa
- **Ulmus Rubra:** lubricating action of the mucous membrane
