DATA SHEET

TENSOPLAST 10 CM

SPECIAL WARNINGS

This product contains natural latex, which may cause allergic reactions in susceptible individuals.

PACKAGING

Roll height 10 cm x 4.5 m length

DESCRIPTION

Elastic, adhesive and porous bandage in high quality fabric for compression and support.
The length-extensible textile support is suitable for forming dynamic stabilization systems, very useful in post-traumatic functional recovery.
The most widespread use concerns traumatology to fix the post-operative dressing.
It performs a supportive function in the treatment of muscle, tendon and joint disorders (elastocompressive treatment).
• Highly stretchable, conformable, absorbent, thermoregulated fabric
• evenly spread porous **zinc oxide** adhesive mass that allows proper skin transpiration, reducing the risk of maceration phenomena
• there is a yellow central line on the bandage that allows for greater precision in application
